

CY 2022 Greenhouse Gas Emissions

Information Technology Strategies, LLC. (“IT-Strat”) measured and established a baseline of our greenhouse gas emissions for Calendar Year 2022 for all facilities owned and leased by the company, employee business related travel, and computers utilized by our telework staff.

IT-Strat’s GHG emissions report provides our measurement of our Scope 1 and Scope 2 emissions, as well as our Scope 3 emissions for CY 2022. IT-Strat attests that the Scope 1, 2 and 3 GHG emissions were calculated in accordance with the GHG Protocol Corporate Accounting and Reporting Standard

In calendar year 2022, IT-Strat’s Scope 1 and 2 emissions measured approximately 12.685 metric tons CO₂e. Its Scope 3 emissions measured approximately 8.271 metric tons CO₂e. The entirety of IT-Strat’s emissions are a combination of the natural gas and the electricity used in the facilities (both owned and leased commercial office space), from employee business travel, and telework operations.

Reduction Targets

Information Technology Strategies, LLC is committed to further reducing our greenhouse gas emissions and our impact on the climate and will establish annual reduction targets beginning in 2023. We believe that establishing and meeting these short and mid-term goals will enable us to achieve significant reductions in our emissions with the goal to be net-zero by or before 2030.
